

1 Q. Before the idea of taking the land came up
2 you had never contemplated, actually thought about,
3 This 77 acres would be a good place for ball fields,
4 correct?

5 A. I'm going to say correct in one thing.
6 You let me finish how I would come to that
7 reasoning.

8 You know what I wanted to do on the
9 landfill when that thing was done? I actually would
10 have liked to have seen it another 50 foot higher,
11 higher than what it was. What a great ski slope
12 that thing would have made. Then you would have had
13 the overlook of -- it would have been the Branford
14 Mountain for sure, if you really want to talk about
15 it, and that's a valuable thing for doing that. I
16 had no problem with the height of the landfill, and
17 then there's that whole complex. That's the limit
18 of that. That was it. The landfill eventually,
19 some day, the only use that's going to have is
20 walking on it. That's it.
